

# MONOBOX™ ELECTRICAL DISTRIBUTION DIA390X600 HS

Product Code: 50206580

Redesigned to be stronger, last longer and be a better product to last in Australia's extreme climate. A high-strength plastic that holds its shape and stays in place no matter the temperature.

 MATERIAL  
High Density Polyethylene (HDPE)

 SIZE  
(L) x 390mm (W) x 600mm (D)

 LOAD RATING  
B

## Features & benefits

### Horizontal Perimeter Ribs

Provides a method to secure the service pit into the footpath to ensure there's no floating or lift out of the ground, avoiding the likelihood of trip hazards.

### High Performance

High-performance plastic utilises UV and Temperature Stabilisers to ensure the product will perform in high-load environments, making this product ideal for any residential or commercial development.

### Cover Range

Designed to use the covers from the Circular pit, making upgrading to the MONObox™ ELECTRICAL Distribution pit easy.

## Full specifications

Material	Manufactured by Infrastructure Products Australia, the new MONObox™ Electrical Distribution pit is engineered to comply with Powercor technical standard requirements and load ratings. Due to the manufacturing method, you'll see less contraction and expansions that alleviate gaps between pit and cover.
Load Rating	Our MONObox™ circular plastic pits are manufactured to a Class B load rating (ultimate limit state design load of 10kN) under the Australian Standard AS/NZ 3996
How it works	Electrical Distribution Pit uses an injection moulding process to manufacture the 390mm diameter x 600mm height pit for class A and B applications.
