

# ENCASEMENT INFILL 1300X1300X250 WITH 900x900 CLASS D (I99D)

Product Code: 50202919

Infrastructure Products Australia' precast encasements are manufactured using a 40MPa steel reinforced concrete and come in a variety of sizes to suit Infrastructure Products Australia' broad range of access covers, including GMS and cast iron covers.

 MATERIAL  
Ductile Cast Iron, Precast Concrete

 SIZE  
1300mm (L) x 1300mm (W) x 250mm (D)

 LOAD RATING  
D

## Features & benefits

### Variability in size

Our precast encasement range comes in a variety of sizes to accommodate for our broad range of access cover options to ensure you have the right combination for your project.

### Extensive life span

Design engineered to meet industry and installation requirements, your precast encasement is guaranteed to withstand even the harshest conditions.

### Heavy duty applications

Manufactured using steel reinforced 40MPa concrete, Infrastructure Products Australia' precast encasements are an excellent solution for heavy duty applications.

## Full specifications

Material	High strength concrete has a compressive strength of 40MPa or greater. Infrastructure Products Australia manufactures their precast encasements using steel reinforced concrete to ensure a minimum of 40MPa. This ensures that our precast encasements remain durable and robust throughout their lifetime.
Load Rating	Precast encasements are manufactured a Class D load rating (a serviceability design load of 900kN) under the Australian Standard AS/NZ 3996. This makes our precast encasements suitable for docks, wharves and airport runways.
