### ENCASEMENT GRATE 1300X1000X150 WITH 900×600 CLASS B

Product Code: 50206963

Infrastructure Products Australia' precast encasements are manufactured using a 40MPa steel reinforced concrete and come in a variety of sizes to suit Infrastructure Products Australia' broad range of access covers, including GMS and cast iron covers.

Ductile Cast Iron, Precast Concrete

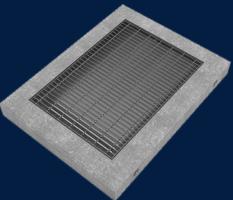

1300mm (L) x 1000mm (W) x 150mm (D)

LOAD RATING

# Features & benefits

#### Variability in size

Our precast encasement range comes in a variety of sizes to accommodate for our broad range of access cover options to ensure you have the right combination for your project.

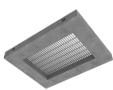

#### Heavy duty applications

Manufactured using steel reinforced 40MPa concrete, Infrastructure Products Australia' precast encasements are an excellent solution for heavy duty applications.

#### **Bespoke** capabilities

Custom sizing of our precast encasements is available to suit the unique requirements of your project, so that you can be confident you're getting exactly what you need.

## **Full specifications**

Material	High strength concrete has a compressive strength of 40MPa or greater. Infrastructure Products Australia manufactures their precast encasements using steel reinforced concrete to ensure a minimum of 40MPa. This ensures that our precast encasements remain durable and robust throughout their lifetime.
Load Rating	Infrastructure Products Australia' precast encasements are manufactured a Class B load rating (a serviceability design load of 900kN) under the Australian Standard AS/NZ 3996.
